**What type of liquid products do you use or store on your site in quantities of 1 gallon or more? Check each box that applies.** (This information will be used to formulate the proper spill kit components for your business.)

### Cleaning products

- ☐ bleach
- ☐ drain cleaners
- ☐ sanitizer
- ☐ soap
- ☐ other fluids (list) \_\_\_\_\_

### Food preparation/ waste

- ☐ cooking oil
- ☐ grease (new or used)
- ☐ other liquids (list) \_\_\_\_\_

### Petrochemicals

- ☒ antifreeze
- ☒ brake fluid, transmission fluid
- ☒ gasoline
- ☒ machine oil, cutting oils
- ☒ motor oil
- ☒ hydraulic fluid
- ☐ other fluids(list) \_\_\_\_\_

### Solvents & paints

- ☐ auto parts solvent, citrisolve
- ☐ dry cleaning fluids
- ☒ paint thinner, turpentine
- ☐ paint, coatings; oil based
- ☒ paint, latex
- ☒ sealers
- ☐ wood preservative
- ☐ others (list) \_\_\_\_\_

### Acids, bases, chemicals

- ☒ acid
- ☐ ammonia
- ☒ caustic, bases, lye
- ☒ photographic chemicals
- ☐ pesticides, herbicides

### Other

- ☐ fertilizers
- ☒ inks, dyes
- ☐ other (list) \_\_\_\_\_

**The following are examples of actions to take in the event of a spill. Please check all that apply to your business.**

### Notification

- ☒ Alert manager/owner of spill
- ☒ Immediately alert area occupants and supervisor, and evacuate the area, if necessary.
- ☒ Contact Emergency at 911 if there is a fire or medical attention is needed.
- ☒ Evaluate if you are trained, knowledgeable and equipped to handle the incident.
- ☒ If spill gets into storm drain or other water body, contact agencies listed below. First call should be to Department of Ecology

10/13/04; RV: Rev 3

**Spill Clean Up**

- X Obtain personal protective equipment, as appropriate to the hazards. Refer to the Material Safety Data Sheet or other references for information.
- X Stop source of spill (upright container, plug leak, etc)
- X Seal off storm drain with berms or drain cover and stop any spread of the spill.
- X Protect floor drains or other means for environmental release. Spill socks and absorbents may be placed around drains, as needed.
- X Use pads and/or granular sorbent to clean up spilled material
- X Let pads sit on spill to absorb spilled material

**Spill & Clean Up Material Disposal**

- X Loose spill control materials should be distributed over the entire spill area, working from the outside, circling to the inside. This reduces the chance of splash or spread of the spilled chemical.
- X When spilled materials have been absorbed, use brush and scoop to place materials in an appropriate container (see flow chart)
- X Remove spent pads and/or sorbent and dispose of properly (see flow chart)
- X Call spill clean up contractor

**Also, please provide a short description of any additional emergency cleanup and disposal procedures not listed above that you will use at your site.**

**Alaskan Copper currently has an Emergency Response Contract with Clean Harbors Environmental as a primary responder to any environmentally sensitive spill.**

**Provide Contact Names and Phone numbers for the following in the table below:**

	<b>Contact Names</b>	<b>Contact Phone Numbers</b>
<b>Business Owner, Site Manager, or Environmental Officer</b>	Jim Brown	(b) (6)
<b>Onsite Spill Cleanup Coordinator(s) (person to notify)</b>	Jerry Thompson	206-571-6033
